
Recycling

Posted by N & K Kberger - 04/27/2009 03:19pm

We recently started to recycle and added it to our APPL trash service. We are, however, having a hard time figuring out what items we can OR cannot recycle. Does anyone have any advice about this? APPL said we just put them in bags by the street on Thursdays. I asked about what types of plastic they accept - they said probably anything. Do plastics, paper, etc...need to be separated into their own bags OR do they separate it for us? I have been doing research and it appears there are some plastics that are not good to recycle.

If you recycle and have advice - we would appreciate any help or advice!

Thanks...
